

WORK EXPERIENCE

•IEEE IIT Kharagpur Section

Jun 2023 - Aug 2023

Research Intern

Remote

- Worked on a research project based on Image Segmentation and Deep Learning
- Built a dataset of medical ultrasound images and pre-processed the input data to remove motion and obtain clean input images. and a deep learning model to perform image segmentation on the same, obtaining an accuracy of 99.29 percent.

•Moneyflo

Mar 2023 - Present

Full Stack Developer

Remote

- Worked on the Frontend of the Web Application using NextJS along with Firebase
- Worked on building RestAPI endpoints based on FastAPI as well as the NestJS Frameworks.
- Worked with AWS, primarily utilising s3, ec2 and lambda gaining hands-on experience in real time projects.

•PE Front Office

Dec 2022 - Jan 2023

Web Development Intern

Remote

- Worked primarily on the Frontend of their client facing Help Centre, working on implementing new features as well as cleaning the user interface to make it more pleasing for their clients, as well as improving the user experience.

•Ridecell

May 2022 - Aug 2022

Software Engineering Intern

Remote

- Worked as a part of the QA and automation team working on both API and Mobile Testing.
- Worked primarily using Python, Selenium, Pytest, and Appium to ensure smooth functioning of the API endpoints as well as the mobile app functionality.

•Apice Tech

Apr 2022 - Jul 2022

FullStack Engineer Intern

Remote

- Worked on creating clean, reusable, and responsive components for the UI of their product. Also worked on the server side of their Application in Java (Springboot) and wrote unit tests for various microservices.
- Worked with React JS and Java to ensure a clean UI of the website and a smooth functioning server.

•SantaNet

Aug 2021 - Jan 2022

Web Development Intern

Remote

- Over the course of my part-time internship at SantaNet as a WebDeveloper, I worked as a part of a team of 4 developers, working primarily on the Frontend of the Website for this NGO, using ReactJS.

RESEARCH EXPERIENCE

•Analysis And Comparison Of Different Frontend Frameworks

Published in: Springer CCIS Vol 1804- DOI: 10.1007/978-981-99-2264-2-19

•Survey of the use of AI models and techniques in the analysis and prediction of neuro-degenerative diseases

Published in: IOP Journal of Physics Conference Series- DOI: 10.1088/1742-6596/2571/1/012022

•Exploring IoT-Blockchain Integration in Agriculture: An Experimental Study

Published in IEEE Access: DOI: 10.1109/ACCESS.2023.3334726

PROJECTS

•PsychUp

<http://psychup.org.in/>

- Led a team of 4 members, and worked on building a platform to bring to life the idea of increasing awareness regarding the field of mental health. Worked primarily with MongoDB, ExpressJS, ReactJS and NodeJS.
- After extensive research, worked on including a comprehensive Personality Test as part of the platform based on the Myers-Briggs Personality Test.

•DataGrad

<https://datagrad.netlify.app/>

- Worked on building a platform to provide users with information regarding the top courses on particular topics across a variety of MOOC Platforms (Recommender System). Worked primarily using ReactJS, Flask, Python, Pandas, sklearn, CSS, and Bootstrap in a team of 4 individuals to complete this project.
- The backend features a custom ML-based Recommendation API developed through the Python-based Flask framework. The front end of the application is based on React Js, HTML CSS, and Bootstrap.
- Succeeded in providing students with a one-stop platform to scan a multitude of MOOCs and gain information regarding the top courses of the skill they wish to learn.

•Decrypt

- Built a website for D3crypt: IEEEESBM's annual cryptic hunt, working primarily with MongoDB, NodeJS, ExpressJS, React JS, CSS, and Bootstrap
- Worked on centralized state management of the application using Redux, efficiently handling Routing. Also handled Database Management on MongoDB Cluster and AWS S3 to ensure scalability.
- The D3crypt competition was conducted successfully on the website, with around 200 people registering for the same and actively participating. Experiencing a smooth user flow and experience on the website.

•Certman

- An in-house portal to generate online certificates for all events conducted by IECSE Manipal, MIT's official Computer Science Club.
- Optimized the tedious manual process of sending certificates to attendees. In-app features include uploading participant's details in xlsx file format, dynamic layouting of certificate templates, generation of individual certificates, and mailing.
- Developed the backend API routes for certificate generation, authentication, data uploading, parsing and mailing. Worked on certificate verification using QR Codes, and used AWS S3 for scalability.

EDUCATION

•Bachelor of Technology in Computer Science and Engineering

Manipal Institute of Technology, Manipal

2020 - 24

CGPA: 9.43

•Current Branch Rank of 14 out of 252 Students

TECHNICAL SKILLS AND COURSEWORK

Languages: C/C++, Python, Typescript, SQL, Bash, Java

Frameworks/Tools: MongoDB, ReactJS, NextJS, Angular, AWS, Docker, Git, Selenium, Appium, NodeJS, Tensorflow, PyTorch

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering.

OTHER EXPERIENCE

•Manipal Open Source Society- Technical Head

Aug 2022 - Aug 2023

- Was a part of the first board of the Manipal Open Source Society, the official open source club of MIT Manipal, in the capacity of Technical head
- Built the website of the club using ReactJS and Saas
- Oversaw the overall functioning of the Technical domains of the club.
- Worked on conducting events and workshops to increase awareness regarding Open Source.
- Worked on mentoring and guiding junior members of the club as they enhanced their professional, technical skill sets.

•Secured 3rd position in inter-college hackathon Exodus conducted by IEEE Manipal

Nov 2022

•Secured 1st position in inter-college hackathon DevSprint conducted by ISTE Manipal

Mar 2023
